

**Project:** Norton Museum of Art – Southwest Wing Addition

**Contact:** Philip G. Welkert  
(561) 832-5196  
1451 South Olive Avenue  
West Palm Beach, FL 33401

**Project Status:** Completed On-Time & On-Budget in 2003

**Engenuity Group Performed the Following Services for this Project:**

As a team member for this project, Engenuity Group, Inc. was responsible for all civil improvements, which include new parking facilities, water and sewer, drainage, site improvements, and a boundary survey. Engenuity Group conducted a special survey to locate graves and grave stones under the existing building and proposed expansion site. The civil improvements were designed with the criteria that school children, tour buses and automobiles, needs of handicapped employees, visitors, and children be accommodated. With this in mind the parking facilities incorporated a large turnaround to accommodate buses and easy access for handicapped individuals. Engenuity Group also provides construction observation services which at times proved challenging, due to the project's phasing and accelerated construction schedule.
